

Jakob Jonasson

Grand Forks, ND

Professional Summary

Network engineer with production experience delivering multi-site enterprise Cisco environments. Lead engineer on a client's acquisition of eight poultry production facilities from one of the largest businesses in America, separating each site from the parent network and integrating it into the client's WAN. CCNA certified, CCNP Enterprise in progress.

Technical Skills

Networking: Cisco IOS-XE, OSPF, FHRP, 802.1X/RADIUS, VLAN Segmentation, VPN/IPsec, SD-WAN, LAN/WAN, Meraki, Aruba

Security: SonicWall, Datto EDR/AV, Duo MFA/SAML SSO, NAC, incident response, vulnerability and firmware lifecycle management

Automation & Cloud: Python, AWS (VPC, Security Groups, IAM, Lambda), Git

Experience

Network Engineer | Twotrees Technologies – Grand Forks, ND

Oct 2024 – Present

- Sole escalation engineer for a top four U.S. turkey processor supporting their internal IT team for all level 3 escalations and network work as the client grew from 10 to 18 sites across six states in three months, nearly doubling their footprint.
- Planned and led network migrations across eight facilities the same client acquired, sole lead engineer on the first three sites, then lead of a two-engineer team on a four-site cutover roughly three times its size, completed in a single Friday–Monday window during four days of facility downtime.
- Replaced legacy SD-WAN with next-generation firewalls and established site-to-site IPsec tunnels integrating each acquired facility into the client's multi-site WAN.
- Operate and extend a 400+ device Cisco campus environment across Catalyst 9500 StackWise Virtual cores, mixed-generation Catalyst access switching, HSRP-redundant distribution carrying OT networks, and 9800 WLC pairs in HA SSO with guest anchor.
- Design and support wireless across Cisco 9800 and Ruckus platforms for plant-floor, warehouse, and office environments.
- Manage SonicWall, Cisco, and Meraki edge across a 200+ firewall fleet, including coordinated zero-day mitigation and Duo MFA with Entra ID SAML SSO for AnyConnect and SonicWall SSLVPN remote access.
- Led CJIS compliance initiatives for county jail and 911 center clients. Met directly with stakeholders to assess gaps, scoped remediation, and implemented solutions end to end.
- Scope and design network refreshes across the firm's client base, assessing current-state environments and producing sized equipment recommendations and bills of materials across Cisco Catalyst, Ruckus, SonicWall, Aruba, and Meraki.
- Deployed PRTG network monitoring, created monitors, automated alerts, and built a status dashboard integrated with internal digital signage.

Data Center Technician | Core Scientific – Grand Forks, ND

Dec 2023 – Oct 2024

- Installed, cabled, and maintained servers and networking equipment in a large-scale data center.
- Led a team of 8 technicians to deploy 7,000+ servers across 4 weeks, finishing the weekly quota days ahead of schedule every week.
- Wrote a multi-threaded Python script that scanned 1,000 IPs at a time to find servers missing from asset tracking.

Education

Bachelor of Science, Cloud and Network Engineering | Western Governors University

Conferred July 2026

Certifications

- Cisco Certified Network Professional (CCNP) – In progress, ENCOR passed October 7th
- Cisco Certified Network Associate (CCNA)
- CompTIA Security+
- AWS Solutions Architect Associate
- AWS CloudOps Engineer Associate
- Ruckus Certified WiFi Associate
